PROFESSIONAL SUMMARY

Data Analyst (MIS & reporting) with 1+ year of professional experience delivering SQL/PL/SQL reporting, Advanced Excel (pivot tables, SUMIFS, XLOOKUP/INDEX-MATCH), reconciliation, data-quality controls and Python automation for enterprise operations across 140+ concrete plants. Hands-on with Oracle EBS R12.2.10, pandas, ETL, REST APIs and Databricks/PySpark. Built production reporting workflows that reduced a 2-3 day manual process to minutes, removed approximately 1 hour of recurring daily reporting, and reduced document handling by approximately 80%.

CORE SKILLS

SQL & Databases: Advanced SQL, PL/SQL, Oracle, PostgreSQL, MySQL, complex joins, CTEs, subqueries, window functions, aggregations, stored procedures, query optimization

Excel & MIS Reporting: Advanced Excel (pivot tables, SUMIFS/COUNTIFS/AVERAGEIFS, XLOOKUP/VLOOKUP/INDEX-MATCH, aggregate functions), MIS reports, KPI dashboards, variance analysis, Excel reconciliation, data cleaning

Python & Data Analysis: Python, pandas, NumPy, Matplotlib, Seaborn, data cleansing, validation, reconciliation, exception analysis, data-quality checks

Data Engineering: ETL/ELT, data pipelines, Databricks, PySpark DataFrames, Spark SQL, Delta Lake, MERGE/upserts, incremental loads, deduplication, partitioning

Automation & Integration: Python, REST APIs, batch processing, OCR, PDF/email generation, Excel automation, Git, Postman

Platforms & Domains: Oracle EBS R12.2.10, Jupyter Notebook; accounts payable and finance operations, sales-order ageing, GST data validation, production and volume analytics

PROFESSIONAL EXPERIENCE

Data Analyst (Graduate Engineer Trainee)

RDC Concrete

Oct 2025 - Present

Thane, Maharashtra

- Built and deployed the Daily Volume Tracker for 140+ concrete plants, surfacing zero-production locations and daily volume/cost-impact insights, with formatted Excel exports, for executive leadership.
- Designed a self-auditing SO Ageing pipeline that refreshes Oracle EBS data every 3 hours and independently reconciles 24-hour delivery, improving completeness monitoring and downstream report reliability.
- Automated Accounts Payables exception analysis for unaccounted transactions, pending MRNs and uninvoiced expense POs, replacing approximately 1 hour of daily manual reporting with a single-click workflow.
- Developed Balance Confirmation and Payment Reminder workflows using validated datasets, automated PDF generation and email distribution, reducing a 2-3 day manual process to minutes.
- Developed complex SQL and PL/SQL packages for audit reconciliation, missing IOCL PO/Debit Memo detection, and GST invoice/HSN data-quality checks across newly created ERP organizations.
- Integrated REST API data for BOM/PO workflows and built Python/OCR document processing that reduced manual document handling by approximately 80%.

Software Engineer Trainee

AurionPro

Jun 2025 - Oct 2025

Navi Mumbai, Maharashtra

- Queried and validated PostgreSQL/MySQL application data, integrated REST APIs, supported production debugging and defect resolution, and used Git-based development workflows.

PROJECTS & SYSTEMS

RDC Daily Volume Tracker | Python, Flask, MySQL, Oracle ERP, Excel

- Built a production analytics application combining ERP-synchronized and manually entered production data into plant/area dashboards with produced/invoiced KPIs, month-to-date progress, target attainment, variance analysis, historical comparisons and formatted Excel exports.
- Implemented 30-minute Oracle ERP synchronization, zero-volume alerts, scheduled reports, role/plant-scoped access and audit history.

RDC Accounts Suite | Python, FastAPI, MySQL, Excel, Oracle ERP

- Built a production-oriented finance reporting and reconciliation workspace consolidating permission-controlled workflows for exception reporting, Oracle enrichment, mapping, automated communication and browser-driven operations.
- Automated exception reports, balance confirmations, payment reminders, GST enrichment and Tally-based ageing/trial-balance workflows with background processing and centralized reference data.

Databricks & PySpark Data Engineering | Databricks, PySpark, Spark SQL, Delta Lake

- Built notebook-based transformation workflows covering DataFrame operations, joins, window functions, deduplication, incremental loading, Delta MERGE and partition-aware processing.
