

JARJISH SIDDIBAPA

DATA ANALYST | SQL & PYTHON | DATABRICKS / PYSPARK

Thane, Maharashtra | Open to Mumbai, Navi Mumbai, Thane & Remote | +91 7249550565 | jarjishsiddibapa@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Analyst with 1+ year of professional experience delivering SQL-driven reporting, data-quality controls, reconciliation workflows and Python automation for enterprise operations across 140+ business locations. Strong in SQL/PL/SQL, analytical problem-solving, ETL and validation; skilled in Databricks, PySpark and Spark SQL for scalable data transformation. Converts complex operational data into accurate, reusable and decision-ready outputs while working effectively with business and technical stakeholders.

CORE SKILLS

SQL & Analytics: Advanced SQL, PL/SQL, complex joins, CTEs, subqueries, window functions, aggregations, stored procedures, query optimization

Databricks & Spark: PySpark DataFrames, Spark SQL, transformations/actions, joins, partitioning, Delta Lake, MERGE/upserts, incremental loads, deduplication

Data Engineering: ETL/ELT, data pipelines, data cleansing, validation, reconciliation, anomaly detection, data-quality checks, batch processing

Python & Reporting: Python, pandas, NumPy, Excel, Matplotlib, Seaborn, automated reporting, REST APIs, PDF/email generation

Platforms & Tools: Oracle EBS R12.2.10, PostgreSQL, MySQL, Databricks notebooks, Git, Postman, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Data Analyst (Graduate Engineer Trainee)

RDC Concrete

Oct 2025 - Present

Thane, Maharashtra

Built and deployed the Daily Volume Tracker for 140+ concrete plants, identifying zero-production locations and delivering daily volume and cost-impact reporting to executive leadership.

Designed a self-auditing SO Ageing data pipeline that refreshes Oracle EBS data every 3 hours and independently reconciles 24-hour delivery, improving completeness monitoring and trust in downstream reports.

Automated Accounts Payables analysis for unaccounted transactions, pending MRNs and uninvoiced expense POs, replacing approximately 1 hour of daily manual reporting with a single-click workflow.

Developed Balance Confirmation and Payment Reminder workflows with validated datasets, automated PDF generation and email distribution, reducing a 2-3 day manual process to minutes.

Developed complex SQL and PL/SQL packages for audit reconciliation, missing IOCL PO/Debit Memo detection, and GST invoice/HSN data-quality checks across newly created ERP organizations.

Integrated REST API data for BOM and PO workflows and developed Python/OCR document processing that reduced manual document handling by approximately 80%.

Software Engineer Trainee

AurionPro

Jun 2025 - Oct 2025

Navi Mumbai, Maharashtra

Queried and validated PostgreSQL/MySQL application data, integrated REST APIs and used Git-based development practices, building a strong foundation in relational data workflows and production debugging.

PROJECTS

Databricks & PySpark Data Engineering Practice | Databricks, PySpark, Spark SQL, Delta Lake

Built notebook-based transformation workflows covering DataFrame operations, joins, window functions, deduplication, incremental loading, Delta MERGE and partition-aware processing.

VizDoom Performance Analytics | Python, pandas, NumPy, Matplotlib

Created Jupyter analysis pipelines to compare PPO, DQN, A2C and DDPG using rewards, survival time, action distributions and training trends across multiple game levels.

EDUCATION

B.E. Computer Science Engineering, Honors in AI/ML

A.P. Shah Institute of Technology | CGPA: 9.54/10

2022 - 2025

Diploma in Computer Science Engineering

Muchhala Polytechnic | 92.63%

2019 - 2022
