PROFESSIONAL SUMMARY

Data Analyst with 1+ year of experience writing SQL/PL-SQL queries, building automated reporting pipelines, and integrating Oracle EBS ERP data across 140+ business locations. Skilled in Python, Power BI, and Excel for data cleaning, ETL, and statistical analysis, with a consistent track record of replacing manual, Excel-driven reporting with self-auditing automated systems that cut turnaround time from days to minutes.

TECHNICAL SKILLS

- **Data Analysis & Reporting:** SQL, PL/SQL (Oracle EBS R12.2.10), Advanced Excel, Power BI, Dashboard Reporting, Data Visualization
- **Python:** pandas, NumPy, Matplotlib, Seaborn, scikit-learn, openpyxl
- **Databases:** Oracle EBS, PostgreSQL, MySQL
- **Core Concepts:** ETL, Data Cleaning, Statistical Analysis (Hypothesis Testing, Regression), Data Warehousing, Report Automation, Agile
- **Tools & Integration:** REST APIs, Git, Postman, Windows Task Scheduler, Docker (basic)

EXPERIENCE

Data Analyst (Graduate Engineer Trainee)

Oct 2025 – Present

RDC Concrete | Thane

- Built and deployed the Daily Volume Tracker, a production monitoring dashboard that auto-flags zero-production plants across 140+ concrete plants and emails daily volume and cost-impact reports (including headcount/TM allocation) to the executive committee.
- Designed a self-auditing SO Ageing data pipeline that pushes customer ageing data from Oracle ERP to an internal system every 3 hours and generates an independent 24-hour reconciliation report to verify delivery integrity.
- Automated the Accounts Payables reporting workflow (Unaccounted Transactions, Pending MRN, and Uninvoiced Expense PO reports) for the Accounts team, replacing a ~1-hour daily manual process with a single-click report generator.
- Wrote SQL reconciliation queries to identify IOCL fuel-card transactions missing Purchase Order/Debit Memo records, directly supporting formal audit report generation.
- Built a GST Invoice Number enrichment utility and an HSN master-data cleaning SQL package to maintain data integrity across newly generated ERP organizations.
- Developed a Balance Confirmation & Payment Reminder automation suite (PDF + email generation) integrated with Oracle ERP R12.2.10, reducing a 2–3 day manual process to minutes.
- Authored PL/SQL packages and automated SQL reports, cutting report generation time from days to minutes; built an OCR-based (Tesseract) PDF processing tool that reduced manual document handling by ~80%.
- Led data integration via REST APIs for BOM and PO creation workflows; contributed to an AI chatbot project for the corporate website using Python and LLM APIs (Gemini, Claude).

Software Engineer Trainee

Jun 2025 – Oct 2025

AurionPro | Navi Mumbai

- Developed full-stack Java applications using Spring Boot and Angular; applied clean code practices and design patterns.
- Worked with relational databases (PostgreSQL, MySQL) and Git for version control; gained exposure to backend data workflows.

PROJECTS

- **VizDoom RL Agent — Python, VizDoom, pandas, Matplotlib:** Implemented and compared PPO, DQN, A2C, and DDPG reinforcement learning algorithms; built Jupyter pipelines to track and visualize agent training performance across multiple levels.
- **MVC Bank App — Java, JSP, Servlet, MySQL:** Built a digital banking application with role-based authentication, core banking operations, and an admin dashboard with full CRUD and transaction oversight.

EDUCATION

A.P. Shah Institute of Technology <i>B.E. in Computer Science Engineering Honors in AI/ML — CGPA: 9.54/10</i>	2022 – 2025
Muchhala Polytechnic <i>Diploma in Computer Science Engineering — 92.63%</i>	2019 – 2022
