PROFESSIONAL SUMMARY

Data Analyst and full-stack developer with 1+ year of experience analysing Oracle EBS data across 140+ concrete plants with SQL/PL/SQL, Advanced Excel and Python, and building the web applications around it (React, Node.js/Express, Flask, FastAPI, MySQL). Automated reporting and reconciliation workflows that cut a 2-3 day manual process to minutes, removed about 1 hour of daily manual reporting and reduced document handling by about 80%.

CORE SKILLS

SQL & Databases: Advanced SQL, PL/SQL, Oracle, MySQL, PostgreSQL, complex joins, CTEs, subqueries, window functions, aggregations, stored procedures, query optimization
Advanced Excel: Pivot tables, SUMIFS/COUNTIFS/AVERAGEIFS, XLOOKUP/VLOOKUP/INDEX-MATCH, aggregate functions, data cleaning, Excel reconciliation, variance analysis, formatted report automation
Python & Data Analysis: Python, pandas, NumPy, Matplotlib, Seaborn, data cleansing, validation, reconciliation, exception analysis, OCR and PDF processing
Web Development: React, JavaScript, TypeScript, Node.js, Express, Flask, FastAPI, REST APIs, HTML/CSS, Ant Design, Recharts, JWT role-based access, OAuth 2.0, scheduled sync jobs
Platforms & Tools: Oracle EBS R12.2.10, ManageEngine ServiceDesk Plus API, Tally, Git, GitHub Actions, Postman, Jupyter. Domains: accounts payable, SO ageing, GST validation. Learning: Databricks, PySpark

PROFESSIONAL EXPERIENCE

Software Developer (Graduate Engineer Trainee) — **Oct 2025 - Present**
RDC Concrete — *Thane, Maharashtra*

- Built and deployed the Daily Volume Tracker web app for 140+ concrete plants, surfacing zero-production locations and daily volume/cost-impact insights, with formatted Excel exports, for executive leadership.
- Designed a self-auditing SO Ageing pipeline that refreshes Oracle EBS data every 3 hours and independently reconciles 24-hour delivery, improving completeness monitoring and downstream report reliability.
- Automated Accounts Payables exception analysis for unaccounted transactions, pending MRNs and uninvoiced expense POs, replacing approximately 1 hour of daily manual reporting with a single-click workflow.
- Developed Balance Confirmation and Payment Reminder workflows using validated datasets, automated PDF generation and email distribution, reducing a 2-3 day manual process to minutes.
- Developed complex SQL and PL/SQL packages for audit reconciliation, missing IOCL PO/Debit Memo detection, and GST invoice/HSN data-quality checks across newly created ERP organizations.
- Built a Python/OCR invoice-stamping tool (approximately 80% less manual handling; recognized by the CFO) and an in-house PKCS#11 digital-signature app that replaced a paid INR 20k+/user tool.
- Built full-stack internal applications (React with Node/Express, Flask and FastAPI on MySQL) with role-based access, audit history, scheduled ERP/ManageEngine syncs and Excel reports, including service-desk analytics across about 60,000 requests.

Software Engineer Trainee — **Jun 2025 - Oct 2025**
AurionPro — *Navi Mumbai, Maharashtra*

- Queried and validated PostgreSQL/MySQL application data, integrated REST APIs, supported production debugging and defect resolution, and used Git-based development workflows.

PROJECTS & SYSTEMS

RDC Daily Volume Tracker | *Python, Flask, MySQL, Oracle ERP, Excel*
- Built an analytics app merging ERP-synchronized and manual production data into plant/area dashboards with target attainment, variance analysis, Excel exports, zero-volume alerts and audit history.

RDC Accounts Suite | *Python, FastAPI, MySQL, Excel, Oracle ERP*
- Built a permission-controlled finance workspace automating exception reports, balance confirmations, payment reminders, GST enrichment and Tally-based ageing workflows.

RDC ManageEngine Analytics | *React, Node.js, Express, MySQL, Ant Design, Recharts*
- Built a service-desk analytics app on about 60,000 requests: technician turnaround, reassignments, reopens and first-reply times, with scheduled syncs, Excel reports, role-based access and automated backups.

RDC Digitization Review | *React, Node.js, Express, MySQL, JWT, GitHub Actions*
- Built a request and digitization tracker with a 30-minute ManageEngine sync, Excel bulk-update round trip, weekly PDF report import, field-level audit history and role-based access.

RDC PDC Manager | *Python, Flask, MySQL, Oracle ERP, Chart.js*
- Built a role-based app managing post-dated cheques through a 13-status lifecycle with Oracle ERP-synced data, dashboards, an audit trail and an Excel report builder.
